The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 65,67-68,70-71 and 74-80 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ludlow in view of Kvalvik.

Ludlow teaches a tub in Fig. 5, where the headrest 175 is positioned below the upper rim of the spa. Kvalvik teaches a tub T, having a headrest 30 with a speaker and speaker grille 38 therein. In light of this use of a speaker in a headrest, it would have been obvious to the ordinary artisan to employ a speaker in the Ludlow headrest. This renders full response to claims 67-68,70 and 75-80.

Re: claim 71, as these are well known resilient materials, the use of same would have constituted an obvious expedient of choice in design. Likewise, as the use of marine-grade speakers is known in the art, the use of same to perfect this combination would have been obvious to the ordinary artisan as well.

Claims 66, 69 and 72 are rejected under 35 U.S.C. 103(a) as being unpatentable over the art as applied to claim 65 above, and further in view of Diamond.

Diamond teaches the sound source placement of claim 66 in that the speaker 40 is seen to be fed by wires distal of the speaker. Also taught here are a plurality of speakers 40 in Fig. 1a.

Claim 73 stands withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/28/04. This requirement is made final.

In response to applicant's argument that the Kvalvik speaker could not be incorporated in the Ludlow environment, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981). Such an incorporation would not test the skill of the ordinary artisan. There is no evidence that the use of a speaker of the latter would compromise the shape of the Ludlow speaker. In fact with modern day miniature electronics incorporation of a speaker in Ludlow would not be expected to compromise the shape of the headrest and as such would meet the "located below of the upper rim of the housing" test as argued for at the bottom of page 6.

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
